

DIANNE A. DELGADO

INFORMATION TECHNOLOGY - DATA & SECURITY

+63 9454413317

dianneadelgado@gmail.com

www.linkedin.com/in/dianneadelgado

Beyond analytics, I focus on engineering intelligent data ecosystems that are secure by design. I turn complex data into a strategic asset by building scalable pipelines that prioritize data integrity and cyber-resilience. By bridging technology and governance, I ensure that information systems are performant, trusted, and defended against emerging vulnerabilities. I don't just manage data—I engineer its secure and responsible future.

EDUCATION

EULOGIO AMANG RODRIGUEZ INSTITUTE OF SCIENCE AND TECHNOLOGY (EARIST)

S.Y 2013 - 2017

Bachelor in Public Administration

Major in Public Administration

SKILLS

Programming (Python): Architecting scalable data solutions, predictive models, and automated security scripts for enterprise-level threat detection and AI integration.

Databases (Oracle, SQL): Designing and optimizing high-performance SQL ecosystems with a focus on secure data access controls and precise accessibility for critical business intelligence.

ETL Development: Engineering high-performance ETL pipelines that guarantee seamless data integration while ensuring data integrity and encryption across complex enterprise systems.

Defensive Security (SOC Analyst L1 & L2): Implementing real-time threat monitoring and incident response protocols to detect, contain, and remediate vulnerabilities within high-traffic enterprise environments.

Information Security Governance (ISO/IEC 27001:2022): Orchestrating the development of ISMS frameworks that align technical engineering with global compliance standards and rigorous risk management.

Data Governance & Quality Engineering: Championing enterprise-wide frameworks that enforce consistency, elevate data quality, and integrate robust privacy controls for reliable reporting and AI model integrity.

TECHNICAL COMPETENCIES

SOC Analyst Level 1 & 2 Masterclass | Incident Response & Threat Hunting

ISO/IEC 27001:2022 Implementation | Information Security Management Systems (ISMS)

APPLIED PROJECTS

Cybersecurity Operations & Incident Response

Security Infrastructure: Deployed and configured Wazuh SIEM integrated with Sysmon telemetry to enhance organizational monitoring and automate the identification of complex breach attempts.

Incident Response: Performed deep-dive memory forensics on compromised systems to map attack vectors and identify persistent threats, prioritizing the integrity and preservation of digital evidence for post-incident reporting.

WORK EXPERIENCE

DATA ENGINEER

Operations Group - Enterprise Data

APR 2025 - DEC 2025

Information Technology - Data Engineering

SEPT 2022 - APR 2025

Converge ICT Solutions Inc.

Pioneered a New Paradigm for Secure Data Automation

Developed Python-based scripts to automate critical data workflows, accelerating availability by 24 hours. This transformation eliminated manual bottlenecks and reallocated human capital toward high-value strategic initiatives and proactive system monitoring.

Optimized Oracle SQL Ecosystems for Real-Time Intelligence

Re-engineered complex SQL architectures in Oracle to process massive data volumes. By drastically reducing execution times, I established a high-performance foundation that supports immediate operational decision-making and rapid insight generation for executive leadership.

Architected Resilient, High-Volume ETL Pipelines

Designed and managed sophisticated ETL frameworks, achieving a 30% reduction in data latency and a 25% boost in refresh rates. These optimizations ensure seamless, high-integrity data movement across diverse platforms, enabling true information fluidity throughout the enterprise.

Advanced Prescriptive Intelligence through Interactive Visualization

Developed dynamic Tableau dashboards that translate complex, fragmented datasets into clear, actionable visual narratives. This shift from static reporting to prescriptive intelligence empowers stakeholders to execute strategies with increased confidence and data-backed precision.

Spearheaded Scalable Cloud Migrations for Global Access

Led the strategic migration of mission-critical Tableau environments from legacy on-premises servers to the cloud. This initiative significantly improved load performance and ensured secure, global accessibility for distributed teams while enhancing infrastructure scalability.

Established Gold-Standard Data Quality & Integrity Engineering

Implemented rigorous monitoring and quality standards to elevate the reliability of critical datasets. By maintaining a single source of truth data, I ensured the consistency and strategic planning.

SOFTWARE ENGINEER - INTERN

APR 2022 - SEPT 2022

Information Technology - DevOps Team

Converge ICT Solutions Inc.

Developed foundational skills in full-stack web development, focusing on how data moves between the user and the database. I built scalable web tools and integrated APIs to link different platforms. By participating in code reviews and using version control, I ensured that every technical solution met high standards for accuracy and performance.

ADMINISTRATIVE ASSISTANT II & IV

JUN 2017 – DEC 2020

Office of Undersecretary for Planning and PPP

Department of Public Works and Highways (DPWH)

Supervised and coordinated high-volume administrative functions—such as correspondence handling and records management—to support efficient operations within a government agency. Managed procurement activities by preparing purchase requests, monitoring compliance, and ensuring all processes aligned with established government policies and procedures.
